### **Chatillon MT150 Series Test Stand**

The Chatillon MT Series manual test stand is a flexible, easy-to-use solution for force measurement with a 150 lbf (660N) capacity. The 150 mm (6 inch) throat makes the MT Series excellent for testing large specimens, and the removable plate is designed to accommodate metric as well as imperial threaded fixtures. This manual test stand is ideal for tensile testing, compression testing, peel, and flexural testing.

### **Chatillon TCD110**

The CHATILLON® TCD110 Series is an advanced force testing system optimized for production, quality control and engineering applications. The TCD110 System consists of a powerful, yet easy-to-use console; a rugged frame with a 110 lbf (500N) load capacity, and an intelligent load sensing system with measuring accuracies better than 0.1% full scale. The TCD console features a high resolution color graphical display featuring menus, function and numeric keys and status indicators that assist the user in setup, operation and analysis. Information may be displayed in large-format tabular and graphical formats for easy viewing.

### **Starrett FMS 500 Force Measurement System**

The Starrett FMS-500-L2 is a single-column force measurement system optimized for high-volume production and quality control testing. The FMS-500 frame has a 500N (112lbf) testing capacity ideal for tensile or compressive testing. The system includes the test frame, controller & software.
